Portfolio: <https://bit.ly/3WWWTfc>

SUMMARY

Digital Integration and Product Specialist with experience in technology strategy, digital transformation, and data-driven product delivery. Skilled in integrating APIs, documenting workflows, and coordinating testing cycles for AI-driven and cloud-based solutions. Adaptive to translating complex business requirements into scalable, technology-enabled systems. Passionate about leveraging analytics and digital insights to drive operational excellence and customer-centric innovation.

EDUCATION

- National Institute of Technology Calicut** Calicut, India
Bachelor of Technology - Material Science; GPA: 8.27 Dec 2021 - May 2025
Courses: IBM AI Engineering Professional Certificate, Coursera (In Progress ,2025), AWS Cloud Solutions Architect, Coursera (In Progress, 2025)

SKILLS SUMMARY

- Digital and Technical Tools::** REST APIs, SDKs, Postman, JSON, Git, Jira, Power BI, SQL, AWS, GCP
- Analytics and Testing::** Data Analysis, Test Case Design, UAT Coordination, API Testing, Defect Tracking
- Consulting and Business::** Problem Solving, Research and Synthesis, Process Documentation, Workflow Mapping
- Programming skills::** Python, JavaScript (React.js, Node.js), Flask
- Soft Skills:** Cross-functional Collaboration, Communication, Attention to Detail, Time Management

EXPERIENCE

- Landmark Group** On-Site
Executive Trainee (Supply Chain and Product Innovation) July 2025 - Present
 - Integrated:** Integrated AI-assisted delivery communication modules using REST APIs and OpenAI, automating multi-warehouse order updates and improving customer communication efficiency by 60percent.
 - Documented:** Documented end-to-end system workflows and digital process maps, enhancing transparency and supporting operational scalability.
 - Led testing and deployment:** Of a pallet-tracking solution for 20,000+ warehouse assets, reducing manual reporting errors by 70percent.
 - Collaboration:** Partnered with IT and logistics teams to align data flow between cloud dashboards and on-ground systems, driving faster reporting and issue resolution.
 - Data-Driven:** Delivered data insights and performance metrics for operational readiness reviews, ensuring reliability and uptime.
- PentaDots** Remote
UI/UX Designer Intern Oct 2023 - Jan 2024
 - Research and Testing:** Conducted iterative user research and feedback testing, aligning design outputs with user goals and business requirements.
 - Collaboration:** Collaborated with developers to translate design specifications into accurate front-end implementation.
 - Designed:** Designed high-fidelity SaaS prototypes in Figma, improving usability and visual consistency for client products.
- IIT Bombay** On-Site
ML Research Intern May 2024 - Jul 2024
 - ML Model:** Validated and tested machine learning models for segmentation tasks, ensuring reproducibility across environments.
 - Android Deveolpment:** Developed a Flask-based API to deploy a U-Net segmentation model for Android, enabling scalable field testing.
- St. Vincent's Home** Remote
Full Stack Developer (Social Impact Project) Oct 2024 - Feb 2025
 - Social Service:** Developed an end-to-end donor-beneficiary digital platform using React.js and Node.js, integrating secure payment APIs..
 - User Friendly:** Focused on usability and accessibility, improving engagement metrics and platform efficiency.
- DCM Shriram Ltd.** On-Site
Project Intern (Polymer dept) Jan 2025 - Mar 2025
 - Compounding:** Analyzed QA processes for medical-grade PVC compounds, identifying process optimization opportunities.
 - Analysis:** Provided data-driven insights to improve product stability and reduce waste during production cycles.

PROJECTS

- **AI Skin-Care Recommendation Platform::** Built AI + web platform recommending skincare routines by gender and skin type using React, Express, and ML classification models.
- **Options Trading Assistant:** Designed backend system applying ML-based decision support to identify optimal option pairs with high success probability.
- **AI-Enabled Heart Attack Predictor:** Prototyped IoT-integrated wearable for real-time health risk prediction using biosensor data(On-Going).
- **Ab-initio Modeling (Academic Research):** Computed optical and mechanical properties of FAPbI3 using DFT simulations (NITC Research Project).

LEADERSHIP COMMUNITY

- **Design Head – ISTE NITC Chapter:** Led design and tech events impacting 3,000+ students.
- **Design Head – IEDC Summit '24 (Kerala):** Coordinated state-level innovation and entrepreneurship initiatives.

CERTIFICATIONS

- IBM AI Engineering Professional Certificate – Coursera (Completed)
- AWS Cloud Solutions Architect (In Progress)
- Google TensorFlow Developer Certificate (Target 2025)
